

# PROSYSVIEW APP

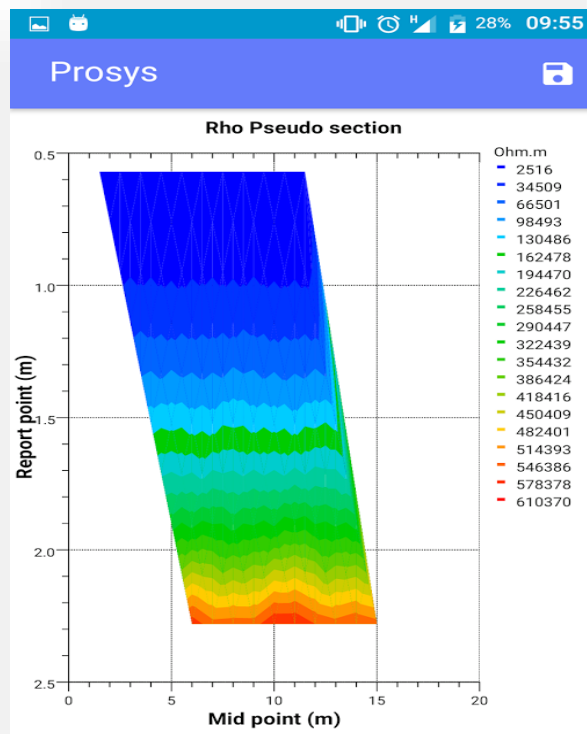

## FREE ANDROID APP

To visualize your .bin files on you Android mobile phone

the [ProsysView](#) Android™ app is available for free on the Google Play to filter, visualize and export the pseudo-section and soundings of resistivity and chargeability after downloading the data on your Android smartphone or tablet.

This app allows your to rapidly control the data quality of a 2D line acquired with a system from IRIS Instruments.

This app typically allows the owner of Wiconnect modules to re-check / visualize the data directly downloaded on their Android smartphone or tablet.

FREE ANDROID APP

VISUALIZE 2D BIN FILES (RHO AND IP PSEUDO-SECTION)

CONTROL DATA QUALITY

VISUALIZE ALL THE COLUMNS VISIBLE IN PROSYS
